Non-GAAP Financial Measures

Information reconciling forward-looking Adjusted EBITDA from continuing operations and Adjusted Diluted Earnings from continuing operations to their respective most directly comparable GAAP financial measures, net income from continuing operations and diluted EPS, is unavailable to AZZ without unreasonable effort because management cannot predict with reasonable certainty all of the necessary components of GAAP net income from continuing operations (such as income taxes, interest expense, unusual or significant gains and losses, acquisition-related expenses, net gains or losses on investments in equity securities and potential future asset impairments). These items are uncertain, depend on various factors, and could have a material impact on net income from continuing

operations and diluted EPS from continuing operations for the relevant periods. We therefore, do not present a guidance range for, or a reconciliation to, the nearest GAAP financial measures of net income from continuing operations or diluted EPS from continuing operations.
